

HTML, CSS & Web Design (CSS)

Course overview

This introductory course teaches you how to design and build websites that look great, are standards compliant and accessible by everyone using the complimentary languages of the web – XHTML and CSS. Learners should be comfortable using Microsoft Windows and the internet.

Suitable for

Anyone with an interest in designing websites and the language associated with creating web pages. This course equips you with the skills to operate effectively as a Front-End Web Developer.

Course outcomes & benefits

By the end of this course, you will be able to hand-code XHTML and CSS to build websites that are standards compliant, easy to maintain and accessible to and usable by everyone – regardless of technology and/or physical impairment.
