

## Visual Basic Programming for Beginners (VBB)

### Course overview

Learn how easy it is to program in Visual Basic in just two days. Create basic applications and a straightforward front-end with forms for your database. Learners should have some experience with basic computer operations and databases.

Gain an introduction to general programming principles, including Object Oriented development, and learn how to quickly develop basic windows applications using Visual Basic and the Microsoft Visual Studio environment. The course takes participants from simple examples through to more involved applications that utilise database and program interaction.

### Suitable for

This introductory level course is suitable for anyone with an interest in programming and design. It equips you with the skills to operate effectively as a programmer or e-Commerce Developer.

### Course outcomes & benefits

At the completion of the course, participants will have been introduced to many different facets of programming, providing a solid basis for further skills development.

### Course content

- Introduction to the .NET Framework and VB.NET
- Introduction to the principles and practices of Object Oriented Programming
- Using the MS Visual Studio development environment
- .NET Data Types and Variables
- Creating Menus
- Making Decisions and controlling Flow in programs
- Keyboard and Screen Support
- Accessing a Database from VB.NET
- Database forms

### Duration & course dates

2 days Sat 02/05/09 & 09/05/09 or  
Sat 19/09/09 & 26/09/09

### Cost

\$725

### Assessment

There is no assessment on this course.

### Location

Ground Floor UNSW L5 Building, 223 Anzac Parade, Kensington NSW 2033
